What is a Para-Medical Staffing Model?

Research has shown that para-medical staff schedule can directly impact patient care and health. A para-medical staff who is neither trained or with outdated information is stressed because of low staff levels and overworked due to poor scheduling makes more errors and can become burnt out. With so much at stake, it can be difficult for hospitals and managers to cater to the needs patients. To help alleviate the stress of staffing

WHO WE ARE ?

The Placement Cell of the Institute Of Public Health & Hygiene brings together a variety of trained workforce with a primary goal of providing trained para-medical professionals gain employment and assist employers in finding qualified workers.

The purpose of the Center is to conveniently bring employment, training and other workforce services to residents and employers in a one-stop environment. The Center is open to anyone seeking employment.
